Your Answer: Not answered

Correct Answer: A digital currency that uses cryptography for security

Result: No answer provided (0.0/1 points)

Question 7: What is Bitcoin?

Your Answer: Not answered

Correct Answer: The first decentralized cryptocurrency created in 2009

Result: No answer provided (0.0/1 points)

Question 8: What is Ethereum?

Your Answer: Agreement among network nodes on the validity of transactions

Correct Answer: A blockchain platform that supports smart contracts

Result: Incorrect (0.0/1 points)

Question 9: What is a smart contract?

Your Answer: Not answered

Correct Answer: Self-executing code that runs on the blockchain

Result: No answer provided (0.0/1 points)

Question 10: What is consensus in blockchain?

Your Answer: Not answered

Correct Answer: Agreement among network nodes on the validity of transact

Result: No answer provided (0.0/1 points)

Question 11: What is Proof of Work?

Your Answer: The process of validating transactions and adding new blocks

Correct Answer: A consensus mechanism that requires computational work to validate

Result: Incorrect (0.0/1 points)

Question 12: What is Proof of Stake?

Your Answer: Not answered

Correct Answer: A consensus mechanism based on holding cryptocurrency

Result: No answer provided (0.0/1 points)

Question 13: What is a node in blockchain?

Your Answer: RTT

Correct Answer: A computer that maintains a copy of the blockchain

Result: Incorrect (0.0/1 points)

Question 14: What is a private key?

Your Answer: Not answered

Correct Answer: A secret code used to access and control cryptocurrency

Result: No answer provided (0.0/1 points)

Question 15: What is a public key?

Your Answer: Not answered

Correct Answer: An address that others can use to send you cryptocurrency

Result: No answer provided (0.0/1 points)

Question 16: What is a wallet in blockchain?

Your Answer: RRRR

Correct Answer: Software that stores private and public keys

Result: Incorrect (0.0/1 points)

Question 17: What is a transaction fee?

Your Answer: Not answered

Correct Answer: A small payment to miners for processing transactions

Result: No answer provided (0.0/1 points)

Question 18: What is double spending?

Your Answer: YYY

Correct Answer: Spending the same cryptocurrency twice

Result: Incorrect (0.0/1 points)

Question 19: What is immutability in blockchain?

Your Answer: Not answered

Correct Answer: Once data is recorded it cannot be altered

Result: No answer provided (0.0/1 points)

Question 20: What is transparency in blockchain?

Your Answer: Not answered

Correct Answer: All transactions are visible to network participants

Result: No answer provided (0.0/1 points)
